

# Evolve for Landscaping

**When you offer a wide variety of services such as landscape/hardscape design, installation, irrigation and grounds management for homebuilders, you find yourself managing hundreds of daily jobs. Evolve for Landscaping provides a cloud portal for job management, time management, and materials management. Field users enjoy an iOS interface allowing them to view schedules, tasks, and create change orders. When landscaping companies are ready to complete for the builders, they use Evolve.**

***“In landscaping, adverse weather can affect your labor, materials and builder contracts. Evolve intuitively manages the labor shifts and customer communication needed to maintain profitability while staying compliant with our contracts.”***

**Evolve for Landscaping provides:**

- A 100% mobile interface
- Ability to document and share the state of the property every time you visit
- Real-time scheduling - helps manage weather delays and communicates contractual obligations to your customer
- Provides field staff with a digital checklist

**nexcom™** enterprise mobility
