

JobNet for Industrial

The demands placed on maintenance companies in the industrial space is great. The hours and investment for training employees always comes first and technology advances often are left out. JobNet for iOS is a state-of-art, cloud-based project management system providing real time quality control, project records, and project safety reporting.

“We use JobNet because providing the best customer service available includes being innovative with technology. JobNet keeps all of our projects current and provides our customers with in-depth details.”

JobNet Provides:

- Employee time sheets, daily logs and materials used on site
- Compliance and safety reporting
- Integrated scheduling
- Client window, daily emails, and full access to project information
